Sedimentary Geology 108 (1997) 229

**Sedimentary
Geology**

Contents Volume 108, 1997

Preface	1
Correlation of Miocene sequences and hydrogeologic units, New Jersey Coastal Plain P.J. Sugarman and K.G. Miller	3
Palynology of the Bryn Mawr Formation (Miocene): insights on the age and genesis of Middle Atlantic margin fluvial deposits F.J. Pazzaglia, R.A.J. Robinson and A. Traverse	19
The Chesapeake Bay bolide impact: a convulsive event in Atlantic Coastal Plain evolution C.W. Poag	45
Paleogene stratigraphy and sea-level history of the North Carolina Coastal Plain: global coastal onlap and tectonics W.B. Harris and R.A. Laws	91
Palynology of the Maastrichtian/Danian boundary at Savannah River Site, South Carolina D.C. Hargrove and D.W. Engelhardt	121
Sedimentology and depositional environments of middle Eocene terrigenous-carbonate strata, southeastern Atlantic Coastal Plain, USA M.K. Harris, P.A. Thayer and M.B. Amidon	141
Influences of depositional environment and diagenesis on geophysical log response in the South Carolina Coastal Plain: effects of sedimentary fabric and mineralogy D.L. Siron and M.P. Segall	163
Stratigraphic correlation of Oligocene marginal marine and fluvial deposits across the middle and lower coastal plain, South Carolina M.P. Katuna, J.H. Geisler and D.J. Colquhoun	181
Mineralogical and textural criteria for recognizing remnant Cenozoic deposits on the Piedmont: evidence from Sparta and Greene County, Georgia, U.S.A. P.A. Schroeder, J.G. Kim and N.D. Melear	195
Reinterpretation of the peninsular Florida Oligocene: an integrated stratigraphic approach G.L. Brewster-Wingard, T.M. Scott, L.E. Edwards, S.D. Weedman and K.R. Simmons	207
